

HYOSUNG

Small Footprint, Branch Transformation Solution

MX8200QTN

The future of enhanced function, **recycling** ATMs is here. The small footprint **MX8200QTN** is designed to assist financial institutions migrating teller transactions with the perfect blend of functionality and modern design to complement evolving branch strategies. The **MX8200QTN** model frees customers to choose how they want to interact with your financial institution by enabling a more robust set of self-service transactions including on-demand video assistance delivered through Hyosung's innovative core integration option. The **MX8200QTN** modular design and high capacity drive Hyosung's industry-leading availability and serviceability. Learn why large and small financial institutions continue to standardize on the MX8200QTN, helping make Hyosung the fastest-growing ATM company in the United States.

KEY FEATURES

INNOVATION

Small, compact footprint cash recycler that can be deployed anywhere. Full function deposit capability enables financial institutions to extend their presence and deliver convenience to consumers.

High capacity recycling module creates efficiencies within the cash cycle.

CAPACITY

High capacity, cash recycling capability and multi-check function. High capacity allows for denomination selection.

FUNCTIONALITY

Delivers transactions via both self-service or video assistance. The small footprint enables a wide variety of placement possibilities including new markets.

The **MX8200QTN** allows for an unparalleled range of transactions types outside the traditional branch space when deployed with Hyosung's innovative core integrated software and powerful video assistance solutions.

HIGHEST AVAILABILITY

Innovative modular design and the use of Hyosung manufactured core technologies allows for fast, easy replenishment and reduced downtime.

The **MX8200QTN** is designed to provide reliability that is unequalled in the market, with minimum maintenance and maximum uptime.

SPECIFICATIONS
